

PLANTES ARIDES

Les plantes arides ou désertiques sont parmi les espèces les plus résistantes que vous trouverez. Elles ont évolué pour survivre dans des zones climatiques caractérisées par des vents violents, une chaleur intense et des précipitations très éparées. Elles stockent généralement le peu d'humidité qu'elles peuvent attirer dans des gousses charnues et la conservent pour... eh bien, pas pour un jour de pluie, mais plutôt pour de longues périodes de sécheresse. Des fleurs éclatantes les aident à attirer les pollinisateurs, ce qui leur donne l'avantage sur les autres plantes environnantes.

(Dudleya brittonii)

BRITTON'S LIVEFOREVER

Une succulente uniquement originaire de Basse-Californie, au Mexique.

(Opuntia humifusa)

FIGUIER DE BARBARIE ORIENTAL

Cactus originaire d'une grande partie de l'est des États-Unis et du nord-est du Mexique.

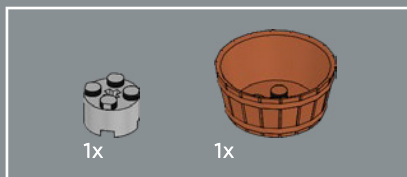

(Mammillaria crinita f. zeilmanniana)

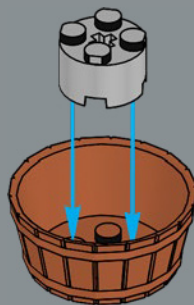

CACTUS COUSSIN

Originaire du Mexique et des régions du sud-ouest des États-Unis, des Caraïbes et de l'Amérique du Sud.

Cette succulente colorée a été nommée d'après Nathaniel Lord Britton, un botaniste américain qui a été le premier à classer le genre *Dudleya*.

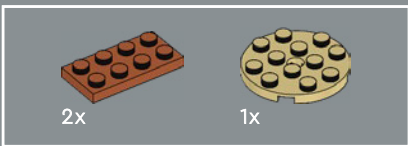

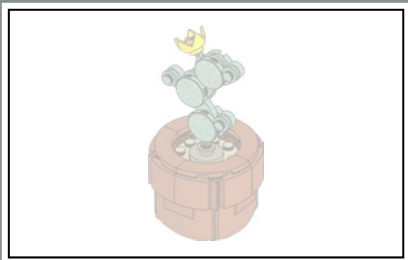

Pour obtenir un joli dégradé de feuilles hérissées, nous avons ajouté une nouvelle couleur à la plaque 1x1 à l'aide d'une dent. Donc, si vous avez des animaux LEGO® chez vous, vous pouvez toujours leur donner de jolies dents lavande.

Les tuiles LEGO® 2x2 rondes à imprimés arborent une nouvelle couleur vert sable et offrent une nouvelle décoration amusante avec des pics pour reproduire l'aspect du figuier de barbarie oriental.

15

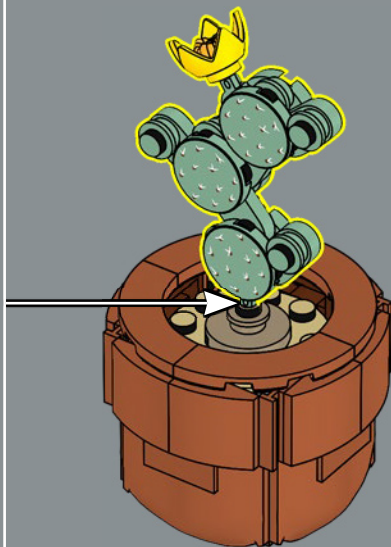

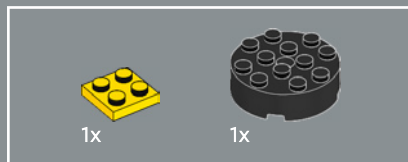

16

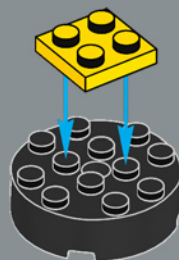

17

Saviez-vous que le fruit du figuier de barbarie est comestible ? Il en va de même pour les gros « coussinets » verts. Veillez juste à enlever les épines avant d'en manger !

Plusieurs espèces de scabieuses développent une belle couronne de fleurs aux couleurs vives.

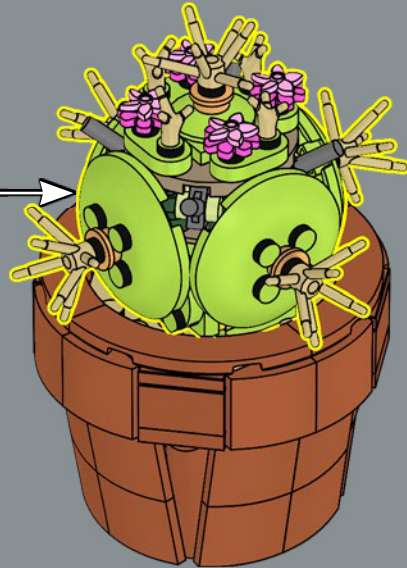

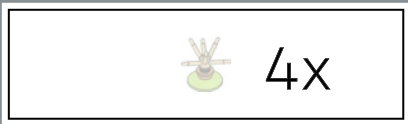

35

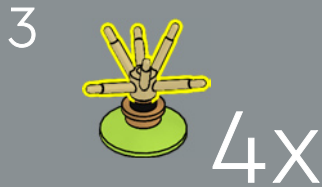

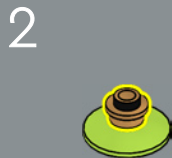

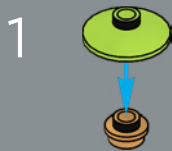

Après avoir été répertoriée pour la première fois à la fin des années 1920, la *Mammillaria crinata* f. *zeilmanniana* était largement inconnue, jusqu'à ce qu'elle soit redécouverte en 1988 dans un canyon au Mexique à un endroit spécifique.
